2019 OUTLOOK

- According to the sources generally used at sector level, it is expected that car production in 2019 will be in line with that of 2018, with a decline in the first half due mainly to China, and a recovery in the second half of the year
- It should however be stressed that there is a lack of visibility at present as to how the year will evolve, and there is also a very high level of volatility in the markets
- Uncertainty also remains as to how the prices of raw materials will evolve
- In such a climate, Sogefi expects revenues to evolve in line with the market, and is committed to recovering profitability particularly in the Suspensions sector

APPENDIX

- In the last quarter of the year, the accounting standard IAS29 (hyperinflation) was applied to the subsidiaries in Argentina, which had:
 - ✓ a positive effect on revenues of €13.5 million, of which € 8.5 million for Suspensions and € 5.0 million for Filtration
 - ✓ A negative in terms of EBITDA (-€1.1) and EBIT (-€2.1)
- Adoption of IAS 29 requires assets and liabilities and income statement restatement to reflect the changes in the general pricing power and financial statements to be converted in euro using the closing exchange rate of the relevant period.
