

Sogefi oil filter for the best selling LCV Ford Transit and popular Peugeot Boxer III and Citroen Jumper.

Sogefi has developed an oil filter responding to the modern OEM needs of the best selling light commercial vehicle in Europe: **the FORD Transit**, this includes Ford Transit 2.2 TDCi - 2014 - 260 2.2 TDCi, Custom Transit and Tourneo 2.2 TDCi.

In Uk the Transit name has become synonymous with vans, registering the first 2 positions as best selling vans in 2016 according to official registration data from the Society of Motor Manufacturers and Traders (SMMT).

This oil filter is also mounted on the **PEUGEOT Boxer III 2.2 HDi** and on the **CITROEN Jumper 2.2 HDi**.

The Sogefi oil filter efficiently protects the engine in retaining harmful particles present in oil, so that a clean oil can circulate around the lubrication system again and prevent unnecessary wear or damage.

This is particularly important for this category of commercial vehicles, driving every day in intensive use conditions.

We recommend regular replacement of the oil filter to ensure: optimum oil flow, protection against harmful particles and perfect lubrication during cold start.

Being an OE supplier is a competitive advantage in the independent aftermarket that benefits from a wide range of coverage with OE quality products encompassing each product family: oil, fuel, air and cabin.

This oil filter is available today with references: Purflux LS1051, FRAM® PH11929, CoopersFiaam FT6151, SogefiPro FT1615.
